May 17, 2024

Dear Hiring Manager,

I am deeply enthusiastic about joining the NextGen Women in STEM Excel Co-op program because it offers a unique opportunity to merge my passion for STEM with a commitment to advancing gender diversity in the field. As the former President of two years of Simon Fraser University's Women in Computing Science (WiCS), I have been actively involved in high school outreach for girls and non-binary students in STEM, running technical workshops, social events, setting up networking opportunities, and overall celebrating the accomplishments of women in computing science. The values of this program resonate deeply with my personal and professional values, and I am eager to contribute my experiences and learn from others within the WiSE community.

Sincerely,

A handwritten signature in black ink, appearing to read 'Denise Siu', with a stylized, flowing script.
